Skills

- Frontend | HTML | CSS | JavaScript | React(basics) | Bootstrap
- Backend | Node | Express | Git
- C | Java(basics) | OOP | English, Hindi, Gujarati

Projects

Tindog website

- Tindog Website is a fun project made to replicate tinder's website that has the data of Dogs instead of Humans!
- Designed and implemented frontend using HTML, CSS, BootStrap.

Drum Kit

- Administered a dynamic drum kit website, featuring a diverse range of high-quality instruments catering to musicians of all skill levels, fostering community engagement and satisfaction.
- Dynamic, Interactive, and Holistic website that encompass front-end development.
- Designed and implemented frontend using HTML, CSS, JavaScript.

Simon Game

- The game will display a sequence of colors or sounds in a specific order.Memorize the sequence presented by Simon.Repeat the sequence by clicking or tapping on the corresponding colors or buttons in the same order.If you successfully replicate the sequence, Simon will add another step to the pattern, making it longer and more challenging. If you make a mistake by clicking the wrong color or button or miss a step in the sequence, the game will end, and you'll have to start over.
- HTML,CSS & JavaScript were used to create an engaging and interactive experience.

Qr Code Generator

- Built a QR code generator using Node.js, allowing users to dynamically generate QR codes for various purposes.
- Designed the frontend using HTML,CSS and JavaScript.
- Harnessing the power of Node.js and Express, to efficiently handle requests and generate QR codes on the fly.
- Leveraged the 'qrcode' library to encode information seamlessly, ensuring robust functionality and user satisfaction.
